7.3.1

Portray the performance of the Institution in one area distinctive to its priority and thrust

Environmental health protection through Waste Management "Waste to Best" Initiative

Our college is situated in rural area surrounded by various industries. For the

involvement of the stakeholders, parents, students of the intuition as well as the peoples from

different sectors to institute, institute organizes various socioeconomic and environment related

events and activities for strengthening the society and institutional academic environment.

Plastic waste is a major environmental issue. Millions of tons of plastic generate every day. It

pollutes our land; waterways and it harms human being and wildlife. It responsible for climate

change. Hence, Plastic waste management plays vital role to protect the environment and

conserves natural resources.

To minimize and control the use of plastic our college takes initiative of "WASTE TO

BEST" under which the college working on "BAN ON PLASTIC" around the college campus.

For this purpose college do the following things.

MoU with RAG-I, Chandrapur unit for waste management.

· Student visited to RAG-I for training, workshop and seminars on west control and

recycling.

Plastic waste collected by students from college campus handover to the RAG-I for

recycling. RAG-I make various useful products such as tables, benches, pots, chair,

decorative materials, flooring tiles etc.

It supports to reduce plastic pollution.

With this activities college try to aware the students and stockholder about plastic waste

management.
